[TCEQ 04.15.2019 Response on Large Vessel Decon Plan.pdf](#)

Helen,

The attachment constitutes the TCEQ's response to ITC's proposed 2nd 80's Fire Deer Park, Large Equipment and Vessel (Southwest Shipyard) Decontamination Plan, 04/14/2019 submitted by Intercontinental Terminals Company – Deer Park. The TCEQ may provide supplemental responses or requests for information at its discretion.

Please let us know if you have any questions or need additional details.

Thanks,

Kendra Bernhagen

Subject: Large vessel and Equipment Decon Plan FOR REVIEW

Please find attached the Large Vessel and Equipment Decon Plan for review.

Please note that this does not replace the Equipment Decon Plan that is currently awaiting approval.

This is a separate plan for decon of large response vessels, MSRC equipment and other equipment too large for the Enterprise site. I have copied the preface below for clarification:

The 2nd 80s Fire Equipment Decontamination Plan provides the plan for the decontamination of on-water response equipment and small response vessels at the Enterprise location (15902 Peninsula St, Houston 77015), and has been submitted for UC approval. This separate Large Equipment and Vessel Decontamination Plan provides the plan for decontamination of large response vessels and barges, all MSRC equipment, and other response equipment that may be too large to handle at the Enterprise site.

Cheers,

Helen Dubach
